SECURITY CONSULTING & TECHNICAL SECURITY COUNTERMEASURES

Your company's assets and employees are extremely valuable and key to your success. A routine assessment of vulnerabilities should be part of any responsible corporation. Some issues that are routinely overlooked can leave a business vulnerable to theft, lawsuits, and bankruptcy.

Our team of professionals can conduct a complete assessment of your company's situation. Our consultants are fluent in Spanish, Italian, and Arabic. Call today for a consultation.

Security Services:

- Crisis Management, Disaster Planning, and Business Resumption
- Executive Protection & Staff Training
- Threat & Vulnerability Assessments
- Proprietary Information Protection
- Workplace Violence Interdiction & Employee Training Seminars
- Security Systems - Assessments, Design & Integration

Technical Security Countermeasures (TSCM):

Sensitive business and personal information can be stolen through a variety of covert techniques. J.A. LaSorsa & Associates helps clients keep sensitive and proprietary information secure.

Backed by extensive experience, J.A. LaSorsa & Associates' team can detect and neutralize surveillance equipment at a client's facility or home. The sweep begins with a physical and electronic search and follow-up with an evaluation of physical security systems. The team then outlines recommendations for immediate and long-term actions.

J.A. LaSorsa & Associates assists private citizens, corporations, and governments with the greatest discretion and protocol utilized at the highest levels of government.

Whatever your threat may be, our team has the counter-measure. All client relationships and case details are maintained on a confidential and sensitive basis.

SECURITY CONSULTING & TECHNICAL SECURITY COUNTER-MEASURES

J.A. LaSorsa & Associates can be called upon to provide Electronic Sweeps of technical Security Countermeasures (TSCM) to detect and eradicate electronic eavesdropping devices.

No matter how high-tech your problem may be, our team has probably seen it before. Some of our staff may even have tested and worked with the various pieces of technology currently violating your corporate or individual privacy.

Our company employs the same techniques and equipment used by the Federal Government. All of our specialists are government-trained and offer an awareness of espionage and information collection techniques to augment their expertise in the detection of electronic eavesdropping systems.

Many corporations schedule electronic sweep of Technical Security Countermeasures (TSCM) services on a periodic basis to ensure a higher level of protection and privacy.

TSCMs are usually conducted because of the following scenarios:

- Suspicion that business or personal conversations are being intercepted.
- Suspicion of the existence of a listening device.
- Noise on the telephone lines.
- Unsolicited telephone repairman visits.
- Information leaks.
- Evidence left behind by burglars / intruders.
- Domestic or business problems.
